Be sure to confirm your fuel source eligibility

Customers must receive service from at least one Investor-Owned Utility for the property (PG&E, SDG&E, SoCal Edison, SoCalGas) to be eligible for financing under the Program. However, some measures are specific to a gas or electric fuel source. Customers who receive electric service from a MUNI (e.g. LADWP or SMUD) may install electric measures, but they will be considered Non-ESMs for the purpose of calculating the credit enhancement. Up to \$1 million of financing per project is eligible to receive a credit enhancement. Up to 30% of that credit enhanced amount may include Non-ESMs.

Customer's fuel source	Gas: IOU Electricity: IOU	Gas: IOU Electricity: non-IOU	Gas: non-IOU Electricity: IOU
Credit Enhancement eligibility	At least 70% of the financing is for gas or electric ESMs. Up to 30% may be used for other property improvements.	At least 70% of the financing is for gas ESMs or ESMs that use both gas and electricity. Up to 30% may be used for electric ESMs and other property improvements.	At least 70% of the financing is for electric ESMs or ESMs that use both gas and electricity. Up to 30% may be used for gas ESMs and other property improvements.

For more information on project eligibility, please review the [At-a-glance Project Eligibility Checklist](#) resource.
